

Non UCITs Retail Scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

FIDELITY ALLOCATOR WORLD FUND

a sub-fund of FIDELITY INVESTMENT FUNDS IV

FIDELITY ALLOCATOR WORLD W-ACCUMULATING

(ISIN: GB00B9777B62)

This fund is managed by FIL INVESTMENT SERVICES (UK) LIMITED

Objectives and investment policy

Objective: The fund aims to increase the value of your investment over a period of 5 years or more through global exposure to higher risk assets.

Investment Policy: The fund will invest at least 70% into funds that use an 'index tracking' (also known as 'passive') investment management approach (these may include funds managed by Fidelity), with the aim of pursuing a lower cost investment approach. The remainder will be invested in other transferable securities, collective investment schemes, money market instruments, cash and deposits and derivatives. The fund aims to maintain a fixed allocation to 100% higher risk assets (such as shares in global, smaller and emerging market companies), but this range may change with market conditions, and will be periodically rebalanced back to its target allocation. As part of the fund's asset allocation process, the Investment Manager will aim to maintain an underlying static asset allocation that is designed in-house and based on proprietary capital market assumptions using quantitative research. For these higher-risk assets, the fund will aim to maintain an allocation of at least 70% in global equities with the remainder spread across assets including global real estate investment trusts, global small cap and emerging market equities. The Investment Manager rebalances the strategy regularly back to these static asset allocations and has discretion over when to do so. However, the Investment Manager does not take relative positions 'overweight' or 'underweight' versus this static mix. The fund does not aim to outperform this static asset allocation.

Investment Process: The fund is managed without reference to a benchmark and has full discretion in its choices of investments within its objectives and policies.

Derivatives and Techniques: Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment. The fund may also use derivatives with the aim of achieving the investment objective.

Base Currency GBP

Distribution: As this is a non-distributing share class, dividends are re-invested.

Additional Information: Income earned by the fund is paid into the fund and reflected by an increase in the value of each share. Shares can usually be bought and sold each business day of the fund.

Risk and reward profile

Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment. The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This fund is categorised in risk class 5 because, in accordance with the investment policy, the value of the investments may fluctuate somewhat sharply. Consequently, both the expected return and the potential risk of loss may be above average. The use of derivatives may result in "leverage" by which we mean a level of exposure which could expose the fund to the potential of greater gains or losses than would otherwise be the case. There is a risk that the issuers of bonds may not be able to repay the money they have borrowed or make interest payments. While we seek to mitigate this, the fund may be exposed to the risk of financial loss if it invests into an instrument issued by an entity that subsequently defaults on its borrowings. Losses may also be realised if an entity that the fund is exposed to ceases to make interest payments over a period of time or indefinitely. Bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall.

Charges for the fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	0.00%
Exit Charge	0.00%
The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.	
Charges taken from the fund over a year	
Ongoing Charge	0.20%
Charges taken from the fund under certain specific conditions	
Performance fee	N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The ongoing charges figure is based on expenses for the year ending 31/10/2025. This figure may vary from year to year. It excludes: • performance fees (where applicable); • portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on Feb. 5, 2013. This share class was launched on Feb. 5, 2013.

Past performance has been calculated in GBP

Practical Information

Depository: JP Morgan Europe Limited.

This key information document describes a sub-fund of Fidelity Investment Funds IV (the "Fund"). The prospectus and periodic reports are prepared for the entire Fund.
